Google Posts - The biggest local SEO opportunity in decades!

For me, this is just another reason to ❤️ Google Posts. Google Posts are *magic* because:

- They're an opportunity for a business to add semantically charged content that will appear *right there on the SERP*
- They're likely to inform Google of the relevancy of that business for long-tail keywords (and even head terms)
- They add to Google's entity knowledge for that business
